**CLAUDETTE** is our magnetic jewelry lady. Most people are curious to know how she got started with magnets. Well, it began a verrrry long time ago . . . come talk to her and she'll tell you how it all began with her ancestors. Magnets fascinate everybody, children and adults. Maybe that's why every refrigerator has magnets on it. She's always played and studied magnets, and then six years ago she hurt my knee one too many times, and if you have met her you know that she is what is lovingly called a "large petite" with the emphasis on the large. Having an X Ray she was told that within six months she would either have to have a knee replacement or be in a wheel chair for the rest of her life. Well this was just not going to happen, but the pain was

excruciating, and she knew that she was in a lot of trouble and had to do something. She launched her search for a better way to apply magnetic therapy and found it in beautiful Magnetite beads and the rest is history as they say. Look around. We have many beautiful designs and if you don't find one that you like, I'll make one just for you! What's my goal? To have everyone in the world wearing magnetic jewelry!
